KRISHNA BHATT

Full Stack Java Developer · 5+ Years Experience

krishnampandya@gmail.com | +1 (226) 637-6545 | Ontario, Canada | Permanent Resident

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Java Developer with 5+ years of experience building scalable enterprise web applications for government, insurance, and logistics clients using Java, Spring Boot, React, and Microservices architecture. Demonstrated ability to deliver secure, performant backend services and responsive UIs - with expertise in JWT/OAuth2, database optimization, and Docker containerization. Currently deepening cloud-native skills through hands-on Microservices training (Spring Cloud, Kubernetes, Helm). Relocated to Ontario, Canada in June 2025 and actively building Canadian portfolio projects. Seeking a mid-level Full Stack or Java Developer role to contribute to a high-performing Canadian team.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL
Backend: Spring Boot, Spring MVC, JPA/Hibernate, RESTful APIs, Swagger/OpenAPI
Microservices: Microservices Architecture, Spring Cloud (in progress), API Gateway, Service Discovery
Frontend: React.js, Angular, Redux, TypeScript, Material UI, HTML5, CSS3
Databases: MySQL, PostgreSQL, MS SQL Server, MongoDB
DevOps & Tools: Docker, Docker Compose, Git, GitHub, Bitbucket, Maven, Gradle, JIRA, Postman, Figma
Cloud & Infra: Kubernetes (in progress), Helm (in progress) — via Udemy Microservices course
Testing: JUnit 5, Mockito, Testcontainers, REST Assured, JaCoCo, TDD
Security: JWT, OAuth2, 2FA, RBAC (Role-Based Access Control)

WORK EXPERIENCE

Full Stack Developer | Independent Projects *Jun 2025 – Present*

Ontario, Canada — Portfolio projects built independently after relocating to Canada (June 2025)

- Built BudgetIQ, a personal finance platform supporting 100+ users with automated recurring transactions, goal tracking, and 2FA authentication — improving efficiency by 50% and backend performance by 30%.
- Developed StrongPass Generator, a secure full-stack password generator with real-time customizable options, RESTful API backend, and React frontend — fully Dockerized with TDD coverage.
- Applied JWT, OAuth2, and role-based access control across both projects; implemented global exception handling and modular, responsive UIs with Material UI.
- Achieved robust test coverage using JUnit 5, Mockito, Testcontainers, REST Assured, and JaCoCo across unit and integration layers for both applications.
- Currently deepening microservices expertise through structured Udemy training covering Spring Cloud, Kubernetes orchestration, Helm, and Spring Security.

Tech Stack: *Java · Spring Boot · React (TypeScript) · MySQL · Material UI · Docker · JWT · OAuth2 · JUnit 5 · Mockito · GitHub*

Senior Full Stack Java Developer | E-Procurement Technologies Ltd. (EPTL) *Aug 2022 – Dec 2024*

Enterprise software company building procurement & document management platforms for government and corporate clients — Gujarat, India

- Led end-to-end development of 4 enterprise web applications (Spring Boot + ReactJS), owning architecture decisions, code reviews, and sprint delivery — improving release speed by 20% through modular design and refined planning.
- Reduced production bugs by 35% by introducing integration testing standards and proactive QA processes across all active projects.
- Designed and documented REST APIs using Swagger, enabling clean integration for 15+ team members and external client systems — accelerating feature delivery by 25%.
- Mentored 15 junior developers on React component design patterns, Git/SVN workflows, and testing best practices, improving team-wide code quality by 30%.

- Built auction and admin modules for the GAIL Web App, reducing post-release defects by 40% through automated pre-release testing coverage.
- Delivered secure digital signature and legal document workflows for the E-Signer App using audit trail logging, improving end-user satisfaction by 30%.

Tech Stack: *Java Spring Boot · ReactJS · Microservices · Swagger · MS SQL · MySQL · Docker · Git · SVN*

Software Engineer | Entrust Software Development *Jan 2020 – Jul 2022*

Software consultancy delivering custom enterprise applications for clients in insurance and logistics — California, USA (Remote)

- Developed Spring Boot backends and React/Angular frontends for 2 enterprise client systems in the insurance and fleet management sectors.
- Reduced API response times by 40% through query optimization, connection pooling, and server-side caching strategies.
- Integrated real-time vehicle tracking using WebSockets and Server-Sent Events (SSE) for the ELD PinPoint Tracker, improving dispatch team fleet visibility by 50%.
- Achieved 85% TDD test coverage on the IMS Insurance System, contributing to 95% on-time sprint delivery across 10 consecutive sprints.
- Built reusable reporting modules that reduced future development effort for similar features by 60%.

Tech Stack: *Java Spring Boot · Angular · React · MySQL · PostgreSQL · WebSockets · JWT · JIRA · Bitbucket*

Software Engineer Intern | Silverwing's Technologies Pvt. Ltd. *Jun 2017 – Dec 2017*

Web development agency — Gujarat, India

- Delivered 5+ client-ready responsive websites using HTML, CSS, Bootstrap, and JavaScript, achieving 99.9% uptime and 35% improvement in page load performance.

PORTFOLIO PROJECTS (Ontario, Canada — June 2025–Present)

BudgetIQ — Personal Finance Tracker GitHub Repo | Video Demo Available

- Full-stack personal finance application with income/expense tracking, goal visualization, and automated recurring transactions — reducing manual data entry by 50%.
- Secured with JWT, OAuth2, 2FA, and role-based access control; backend optimized for 30% faster data retrieval via indexed queries and service-layer caching.
- Containerized with Docker Compose; test coverage via JUnit 5, Mockito, REST Assured, and JaCoCo across unit and integration layers.

Tech Stack: *Java · Spring Boot · React (TypeScript) · MySQL · Material UI · Docker · JWT · OAuth2*

StrongPass Generator — Secure Password Web App GitHub Repo | Video Demo Available

- Real-time password generator with customizable criteria, REST API backend, and React frontend — fully Dockerized with TDD and REST Assured test coverage.

Tech Stack: *Java · Spring Boot · React · Material UI · Docker · JUnit 5 · REST Assured*

EDUCATION

Bachelor of Engineering — Computer Engineering *Graduated Jul 2019*

Gujarat Technological University, India · CGPA: 8.57 / 10

CERTIFICATIONS & CONTINUING EDUCATION

- **Master Microservices: Java, Spring Boot, Spring Cloud, Docker, Kubernetes & Helm — Udemy (In Progress, 2025)**
  Hands-on training in microservices architecture, service discovery, API gateway patterns, Kubernetes orchestration, Helm, and Spring Security. Cloud deployment modules included.
- **Unit & Integration Testing of Java & Spring Boot Applications (TDD) — Udemy (Nov 2025)**
  JUnit 5, Mockito, Testcontainers, REST Assured, TDD methodology, and JaCoCo coverage reporting.
- **Java Developer Program — CDAC, India (Feb 2020)**
  Intensive diploma covering core/advanced Java, OOP, multithreading, data structures, JDBC, and web development.
